

LIQUID DOSES

- 1) How many ml do you give for a dose of guaifenesin 100mg?

Look at the area circled in red, it says:

“Guaifenesin Oral Solution USP
100mg/5ml”

- That means each 5ml contains 100mg of guaifenesin.
- So 10ml would contain 200mg of guaifenesin.
- 15ml would contain 300mg of guaifenesin

2) How many ml do you give for a dose of 150mg diocto liquid?

3) How many ml do you give for a dose of 60mg pseudoephedrine?

4) How much Magnesium hydroxide is in 10ml of Milk of Magnesia?

5) How many ml do you give for a dose of 524mg bismuth subsalicylate?

6) How many ml do you give for a dose of 25 mg of diphenhydramine hydrochloride?
